U.S. Patent and Trademark Office PTOL-37 (Rev. 1-04)	otice of Allowability	Part of Paper No./Mail Date 040105

1. Claims 1-3, 5-11, 13-17 have provided with amendments and new claims 22-32 have been presented. Claims 1-3, 5-11, 13-17, 22-32 been examined and allowed over

the prior art of record.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

3. Applicant has amended and persuasively argued to overcome the rejections

under U.S.C. 35 § 101. The rejections are withdrawn.

4. Applicant has made further amendments to the specification and Abstract,

including providing a new abstract on a separate sheet that overcome the objections to

the specification and abstract. The objections are withdrawn.

5. Applicant has provided a 1449 which complies with the standards of the Office

and therefore the objection(s) has been withdrawn.

6. The prior art does not expressly teach or render obvious the invention as recited

in independent claims 1, 14 and 22.

Though it is known to use failure analysis to determine target device performance

and relative mean to failure and ratios for predictive and stochastic analysis of computer

peripheral performability, the specific methodology and system, as recited in the context

of the independent claims as a whole and directed to the failure scenario generator

modules and performability evaluator module and multi-part performability function for

target system(s) and modeling performance and further argued on page 14, lines 18-27,

Page 3

pages 16, last paragraph et seg. and supported in within citations of the specification was not expressly uncovered in the prior art teachings. Moreover, as the courts have held: "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." Verdegaal Bros. v. Union Oil Co. of California, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987). "The identical invention must be shown in as complete detail as is contained in the ... claim." Richardson v. Suzuki Motor Co., 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an ipsissimis verbis test, i.e., identity of terminology is not required. In re Bond, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990).

Nor were references uncovered that would have provided a basis of evidence for asserting a motivation that one of ordinary skill level in the art at the time the invention was made, knowing of failure analysis and performance analysis methodologies that would render the independent claims obvious over their teachings.

Dependent claims are allowed as they depend upon allowable independent claims.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONTACT INFORMATION

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William D. Thomson whose telephone number is 571-272-3718. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Teska can be reached on 571-272-3716.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
